

*We can make it
happen.*

Organization makes lives easier. Knowing where to find the perfect pair of shoes in a bedroom closet or the exact spot of an ingredient for a favorite recipe saves hours of time hunting, and removes stress from your life. Let me help make your home, office or garage more livable and your life a little easier with my savvy organizing systems.

*In a
perfect world...*

*...your closets
would look
like this.*

Shopping in bulk isn't a problem for homeowners with this attractive and roomy pantry system. The easy-wipe finish makes keeping this system clean and tidy a breeze. (White finish shown, others available)

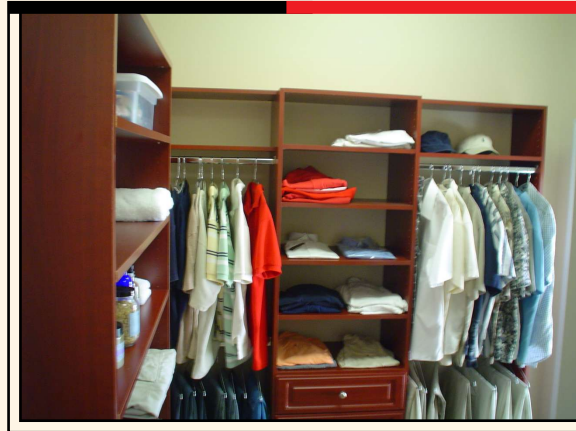

A clever bench hides shoe polish and cleaning equipment while giving you the perfect place to sit and put on your shoes in the mornings.

Drawers conveniently contain socks, hosiery and other related items, keeping it all together, beautifully, in one spot. (Antique White finish shown, others available)

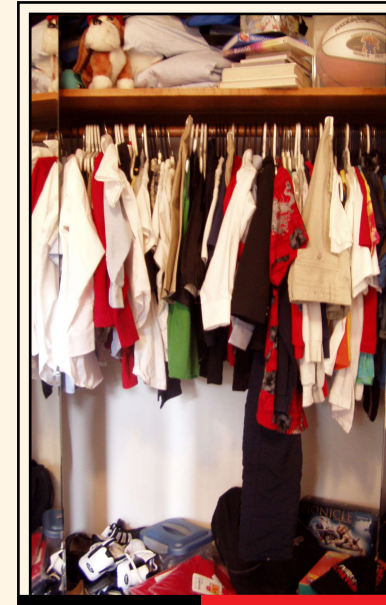

Replace laundry room chaos with harmony with this smart utility shelving unit. A hanging section allows you to air-dry delicates, and baskets hold freshly folded linens and clothes. Laundry products are neatly stored on nearby shelves. (Cherry finish shown, others available)

Shelving takes center stage in this handsome organizing system designed with men in mind. Lots of shorter hanging sections easily handle shirts and pants, allowing men to divide clothes by season, type or color. Hats can be tucked into a neat shelf still within easy reach. Belts and ties hang on a pullout rack that allows men to neatly sort through all of the various choices at hand. (Cherry finish shown, others available)

No fighting over this closet space, as both sides have generous amounts of equal space in shelving and drawers. Velvet-lined jewelry trays are standard on the women's side of the closet. Pullout chrome laundry baskets keep end-of-the-day clutter under control, stylishly.

(Almond finish shown, others available)

Before

Now, finding the right shirt and pants for school are a breeze, and no one is kept waiting. Shelves handle the hats and other accessories that kids need to make any outfit cool, as well as any stray toys usually left underfoot. Less time is spent ironing, as clothes that are hung neatly keep their shape. A hamper collects worn clothing at the end of the day.
